[GITHUB](#) || [DEMO](#)

- Communicated RESTfully between React frontend and Rails backend.
- Utilized JSON Web Tokens and localStorage to store encrypted user information client-side.
- Customized API calls to MediaWiki's API through a self-built proxy to give search functionality.
- Tailored API calls to TheHikerProject's API to give search functionality.
- Implemented Ruby Geocoder gem to geocode a search location into longitude and latitude.
- Interacted RESTfully between vanilla JavaScript frontend and Rails backend.
- Customized API calls using HTTParty via Rails backend.

### Professional Experience

#### Account Executive, Sales Innovation

Glassdoor

DEC 2019 - MAY 2020

#### Account Executive

The Sliding Door  
Company

JAN 2019 - DEC 2019

- Pioneered Self-Serve Sales pilot product.
- Communicated with product engineers and other Go-To-Market sales teams to improve product and sales process.
- Operated in a fast-paced environment, through a high daily volume of activity including outbound calls, emails, web-based presentations, and social selling.
- Built trust with clients and maintained a wealth of product-based knowledge.
